DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 6-13 are drawn to a food comprising the oil composition, classified in class 426, various subclasses.
- II. Claims 14-16 are drawn to a method of inhibiting platelet-aggregation in a mammal with an oil composition, classified in class 514, subclass 558.
- III. Claims 17-22 are drawn to methods of reducing mammalian body fat and reducing body mass index (BMI) with an oil composition.

The three inventions are independent and distinct, each from the other as they have a separate status in the art as shown by their different and separate subject matter for inventive effort. Further, a reference, which anticipates any one of the above inventions, would neither anticipate nor make obvious of the other inventions. Each such invention is capable of supporting its own patent. For these reasons, the restriction requirement is proper.

To be complete, applicants' response must include a provisional election even though the requirement may be traverse.
